

INTERNSHIP REPORT

Python Fullstack Developer Virtual Internship

Submitted by

ARYAN RAJ

B.Tech – Computer Science and Engineering

IILM University, Greater Noida

Internship Duration: June 2026 – August 2026

Duration: 8 Weeks

AICTE – EduSkills Virtual Internship Program

Certificate ID: 49dcb99c3586fec612b1

Issued on: 29 July 2026

1. Introduction

This report presents the learning and training completed during the 8-week Python Fullstack Developer Virtual Internship conducted under the AICTE–EduSkills Virtual Internship Program. The internship focused on web development, programming fundamentals, backend development, databases, and version control.

2. Internship Details

Student Name	Aryan Raj
Institute	IILM University, Greater Noida
Branch	B.Tech (Computer Science and Engineering)
Internship Domain	Python Fullstack Developer
Duration	June 2026 – August 2026
Program Duration	8 Weeks
Certificate Issued	29 July 2026
Certificate ID	49dcb99c3586fec612b1

3. Objectives of the Internship

- Build foundational knowledge of front-end web technologies.
- Understand JavaScript and DOM-based web interactions.
- Learn Python programming and backend development fundamentals.
- Understand Django-based web application development.
- Learn SQL, database querying, and database management concepts.
- Understand Git and version control for managing code effectively.

4. Week-wise Learning

Week	Module	Learning Covered
Week 1	HTML	Page structure, elements, forms, tables, semantic tags and layout fundamentals.
Week 2	CSS	Selectors, box model, positioning, Flexbox, Grid, responsiveness and styling.
Week 3	Bootstrap	Responsive and mobile-first websites, components, grid system and utilities.
Week 4	JavaScript	Variables, functions, loops, conditionals, DOM manipulation and events.
Week 5	jQuery	DOM traversal, animations, event handling and AJAX interactions.
Week 6	Python Programming	Syntax, data types, loops, functions, OOP and backend fundamentals.
Week 7	Django Framework	Models, views, templates, routing and authentication systems.

Week	Module	Learning Covered
Week 8	MySQL & Database Management	SQL fundamentals, database design, CRUD and Django–MySQL integration.

5. Skills Covered

During the internship, the following areas were covered: HTML, CSS, Bootstrap, JavaScript, jQuery, Python, Django, SQL/database management, and Git & Version Control.

6. Learning Outcomes

The internship provided structured exposure to the components of a Python full-stack development workflow. The learning covered both client-side technologies and backend/database concepts, along with version control.

7. Conclusion

The 8-week Python Fullstack Developer Virtual Internship provided a structured learning journey across web development, Python programming, Django, databases, and Git. Successful completion of the internship requirements resulted in the Virtual Internship Credential.

Note: This report is prepared from the official internship offer letter and certificate details supplied for the internship submission. It does not claim any project implementation or activities that are not documented in those sources.
